AtPac Welcomes New Client at Annual Manager's Meeting

Wayne Long, CEO, welcomes Kathy Burke, County Recorder and Larry Burtness, Chief Deputy County Recorder, Washoe County, Nevada to the Annual

Manager's Meeting at the Embassy Suites in South Lake Tahoe on April 24th and announced they were the newest AtPac clients.

Highest Attendance Ever

AtPac held our Annual Manager's Meeting at the Embassy Suites in South Lake Tahoe on April 24. With a total of 47 people at the meeting including AtPac personnel, County officials and guest speakers, attendance was the largest we have ever had at our annual meeting. The meeting was packed full of valuable information and provided a great networking opportunity for all. We are already talking about next year's meeting and what we can do to make it even better than this year's.

Some highlights from the 2008 Annual AtPac Manager's Meeting follow. If you weren't able to attend this year's meeting we hope you will make a note to be there next year so you will know first hand AtPac's plans for the next generation of software. Be sure to call us to obtain more information on any product that interests you.

Product Development Updates

Richard Sandblade, Vice President of Product Development, and Donna Jolley, AtPac Software Architect, revealed AtPac's plans for the next generation of CRiis™. Everyone in attendance was excited and is looking forward to the release of the CRiis 4.0 software later in the year.

The new California Franchise Tax Board integration software (FTB Wizard) was shown.

AtPac's innovative public marriage license and FBN forms were demonstrated.

Asset Manager™

Francisco Quesada – Manager, Imaging Services, presented information detailing the AtPac film conversion operations located in Concord, California.

One of the tools that AtPac has developed to manage the tracking of the County's film inventory is Asset Manager™. As Francisco demonstrated how Asset Manager™ adds value to the service AtPac provides, a lot of interest was generated among the attendees.

As you prepare to enter into the film conversion process, call us to discuss how AtPac and Asset Manager™ can add success to your project.
